Quattro

CES Hire Ltd. supplying the trade since 1983

Utiform Quattro Plastering Machine

- Mixing pump for pre-bagged plasters and renders with large hopper capacity
- Simple, robust, easy to use and clean.
- Fits through all standard doors, 660 mm wide, narrowest machine on the market
- Mixing tube can be inclined with no loss of dry material to change stator or rotor

"A Great Labour Saving Machine"

Can be taken apart in minutes for easy transport.

The worm pump transports the material through hoses to the spraygun where it is sprayed on the surface with compressed air.

Strator fixing system

Standard Equipment:

- Automatic stopping system
- Water pump
- Tool Kit
- Spray gun
- Mixing shaft
- Cleaning tools
- Warranty Certificate
- CE Certificate
- Parts book and manual

Model	three-phase	single-phase
Conveying output	5 to 50 l/min *	5 to 22.5 l/min.*
Pumping distance	40 m *	20 m *
Pumping height	20 m *	10 m *
Voltage	380 V	220 V
Pumping pressure	40 bar max.	40 bar max.
Power of mixing motor	5.5 kW	3 kW
Power of feed motor	0.55 kW	0.37 kW. (220 V)
Air compressor	250 l-min, 5 bar, 0.9 kW	0.75 kW - 220 V-170 l/min. continuous air
Water pressure required	3 bar	3 bar
Electrical connection (5x2.5mm ²)	400 V-50Hz 3 P+N+T 32 A/6h	220 V-50Hz 25 A
Size LxWxH (mm)	1100 x 660 x 1455	1100 x 660 x 1455
Weight	215 Kg	205 Kg
Loading height	870 mm	870 mm

* depends on the consistency, quality and composition of the material, diameter and length of delivery hose and pumping the material height.
